NON-STATE EDUCATIONAL INSTITUTION
"MEDICAL AND SOCIAL INSTITUTE OF TAJIKISTAN"

Medical faculty
The mission of the Educational Program "General Medicine"

The mission of the Educational Program "General Medicine" is to provide quality basic medical education for the preparation of a competent general practitioner, prepared for specialization and lifelong learning, based on the principles of continuous professional education for solving the problems of health protection and improving the quality of life of the population of the republic, as well as being able to contribute to the development of medical science and health care, preserving and increasing the achievements of domestic medical universities.

The mission of the Educational Program in the field of "General Medicine" reflects the main mission of the institute - the training of highly qualified personnel at the diploma level and the continuation of training at the post-diploma level is mandatory for graduates of the medical faculty.

- not at the diploma level - this is the preparation of a doctor specializing in "General Medicine", which can provide qualified assistance at the level of primary medical and sanitary facilities;
- the ability to further education at the post-graduate level (specialization) - for the provision of assistance at the secondary/tertiary level of health care;
- the ability to train in the course of life (continuous training);
- abilities and graduates in the field of "General Medicine" to carry out scientific research.

The mission of the Educational Program reflects the goal and educational strategy, which allows to prepare a competent specialist - a doctor at the level of

diploma (higher) medical education, in the field of health care, with the appropriate basis for a further career in any field of health care, including all types of practice, administrative medicine and scientific research in health care, capable of performing the role and function of a specialist in accordance with the established requirements of the health sector, set for postgraduate education, and taking on the responsibility of lifelong learning.

The medical faculty specializing in "General Medicine", is one of the leading providers of medical services to the population of the Republic of Tajikistan, a scientific and innovative medical center that provides quality education and services in the field of health care in accordance with the requirements of national and international standards, capable of performing the role and function of a specialist in accordance with the established requirements of the health sector.

The main task of the "General Medicine" specialist is the formation of students of high professional qualities, personal values by creating the necessary conditions for obtaining higher medical education at different levels of the educational process (higher to diploma, internship or clinical residency).
